

Browser Support

Document Name	Brower Support
Version	1.0
Effective Date	June 2025
Applies To	All MediMap Customers in AU and NZ
Prepared By	MediMap Support
Approved By	

Supported Browser and Operating System Combinations

- Windows 11 (24H2) with Microsoft Edge (For Business)
- Android 13 or later on Tablets with Chrome
- iPadOS 17 or later with Safari

Policy Notes

Vendor-Driven Support:

We support only those browsers and operating systems that are actively maintained by their respective vendors. If Microsoft, Apple, or Google discontinue support for a browser or OS, Medi-Map will likewise withdraw support.

Latest Versions Only:

Our policy requires that users operate the latest versions of supported browsers and operating systems. Regular updates are essential to maintain compatibility and security.

Unofficial Combinations:

Any browser and OS combination not listed above is unofficially supported. While other browsers (e.g., alternative installations of Chrome) may work, they are used at your own risk.

Display Resolution:

For tablet devices, the screen resolution must be at least 768x1024 (width x height).

Extensions and Plugins:

Third-party extensions or plugins are not covered by this policy. We recommend disabling extensions/plugins if issues occur, as compatibility cannot be guaranteed.
